

Testimonials from Florida School Districts regarding Florida Humanities Council coordinated **Teaching American History** programs:

I would like to thank you and the Florida Humanities Council for all of the wonderful workshops that you have provided for us. Our teachers have attended the Harlem Renaissance and Modern Florida day-long workshops. I was able to attend both of these and thought that they were outstanding. The teachers that attended these workshops also only had extremely positive things to say. In fact, the questions that I got after both of these workshops was "when are they coming back?" Both workshops were extremely well organized and the trainers were extremely knowledgeable. Please feel free to have individuals contact me if they have a question about your workshops. I am more than happy to give a recommendation. Thanks again for everything, Ann. I look forward to working with you in the future on another training.

*Louise Ball, Ed. D.
Secondary Social Studies Curriculum Specialist
School Board of Broward County, Florida*

Our teachers really enjoyed being in St. Augustine. If we write another grant, I would certainly recommend partnering with Florida Humanities Council again. Our experience with FHC was all positive – the content provided, the scholars/historians, the Chautauquans, the experiential activities, the variety of activities, the ease of communication, the responsiveness to us, the materials, etc. were all top-notch plus our teachers gained valuable networking contacts with each other while being away together at the Teacher Center.

*Wanda Gray
Project Manager, Teaching American History Grant
Brevard County School District*

Never before have I actually received thank you notes from teachers for training! I did this time, however. The teachers loved the whole set up and were particularly enamored of the scholars from the University of Florida. Many, many thanks for another superb job.

*Linda Whitley
Teaching American History Grant Project Director
Pinellas County School District*
